

Kashav Madan

Web developer, designer, and entrepreneur.

EDUCATION

University of Toronto, B.Sc., Computer Science (Sep. 2015 – Apr. 2020)

North Park S.S., OSSD, Intl. Business & Tech. (Sep. 2011 – Jun. 2015)

EXPERIENCE

Chapsule, Brampton ON – Cofounder, CTO

March 2015 – Present | <http://chapsule.com/>

SaaS start-up which focuses on engaging audiences at group events through a platform that can be used to share event memories.

Led team of developers on various projects including web platform, internal API, and progressive iOS app.

Empower Youth Vision, Brampton ON – Web Developer

May 2015 – October 2015 | <http://eyvcanada.com/>

Youth-led non-profit organization focused on providing Peel high school students with insight of careers in various industries.

Worked alongside President to revamp WordPress website. Ensured technological requirements were met at bimonthly seminars.

PROJECTS

NPClubReg

February 2014 – June 2015

Wrote a web app for club handling. Used at North Park S.S. for club registration, event/meeting scheduling, and financing. Presented to over 350 students and teachers in June 2014.

NextRideAPI

December 2015

Created an API that allows developers to interface with Brampton Transit bus timings. Built with Node.js and Python.

<http://git.io/vulhA>

TaskMaster

September 2015

Trello-like tool for delegating tasks based on proximity with minimal user interaction. Built at MHacks VI with Swift, Firebase, Wit.ai, and iBeacon.

<http://git.io/vulhD>

TwitterBirthdayResponder

January 2016

Built a Twitter bot in Python. Automatically replies to all birthday-related Tweets with a custom message.
